-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3744

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 19, 21, and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hu in view of Yamada et al. Hu discloses a refrigerator with evaporators in the freezing chamber and refrigerator chamber, and an ice maker in the freezing chamber. However, Hu does not disclose the ice maker to be a clear ice maker. Yamada et al teaches an ice maker having an evaporator plate defining a plurality of pockets over which water cascades. It would be obvious to substitute, for the ice maker of Hu, an ice maker of the type taught in Yamada et al, for the purpose of producing clear ice cubes.

3. Claims 2-4, 8-13, and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hu in view of Yamada et al as applied to claim 1 above, and further in view of Reznikov. Hu as modified by Yamada et al discloses the claimed invention except for the evaporators being in series. Reznikov teaches a refrigerator having evaporators 4, 7 in series. It would be obvious to provide the evaporators 302 and 304 of Hu in series, in view of Reznikov, for the purpose of simplifying the refrigeration system.

4. Claims 5-7, 14, 16-18, and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3744

5. Claims 23-27 are allowed.
6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
